

Re: Art Teacher Position

If you value an experienced, award-winning educator, with STEM/STEAM connected lessons, and someone who is an active team member with leadership skills, I may be just what you're looking for.

I have 25 years experience in my current New Jersey school allowing me a small pension at just 50 years of age. (28 years in total) My spouse and I are looking to move to a warmer climate and have explored your area and found it to be a good fit. I am still passionate about education and seek a school that would appreciate what I have to offer, and would still challenge me as a lifelong learner.

What I bring to the table:

- My STEM connected art program that has my students outscoring their peers by an average of 150 points on exams like the S.A.T.
- 10 Years experience as a publisher, author, and leader of professional development on the local, state, and the national level.
- National and international recognition for my own work as an artist with paintings in museums and the Obama White House.
- An international background from living in such diverse places as Japan, Egypt, and experiencing cultures through extended travel to France, Mexico, Israel, Greece, and Korea.
- A background in working with students with special needs at Eden Autism, Johnson Park School's group homes for autistic youth, as well as inclusion students for the past 25 years.
